(804) 835-2736

Full stack web designer and developer with the technical knowledge and design mindset to create sharp, intuitive, and modern user experiences.

Fish 919 Marketing

2018 - 2025

Sr. Web Developer, Integrations Specialist

Designed and built responsive websites for clients across multiple industries, and integrated data capture to CRMs and analytics for lead attribution and tracking.

Lightbridge Academy - Created a dynamic intake form and scheduler for a multi-site setup that integrated with multiple CRM providers. Developed a system that accounts for multiple data sources and sends information to different databases using predefined rules.

Belfor Franchise Group - Led team initiative to build and maintain multi-site setups across entire BFG corporation. Managed template design, developed tools for more efficient deployment, monitored for and incorporated edits, and executed as-needed tasks.

Mosquito & Pest Authority - Designed front-end of individual franchise location sites. Developed productivity systems while adding new micro-sites to their ecosystem, including dynamic content systems and a streamlined location-finding landing page.

Maxx Potential

2016 - 2018

Apprentice Web Developer

Developed expertise in common web development tools and best practices.

ReadWrite Digital Analytics - Developed the front-end of a web app allowing teachers to check on student metrics at a glance. Designed the dashboard and created functions to easily filter information.

Skraach - Designed and developed a quiz-enabled furniture storefront for interior design students to share collages and inspire users to furnish dream homes.
